INSTALLING THE NEW HUB

NOTE ▶ **NOTE: Place the light on a flat work surface or in a repair fixture before following this procedure.**

1. Remove the top cover by unscrewing the four phillips head screws (photo 1).

2. Remove the two socket head cap screws (photo 2) with a 1/4" allen wrench. This will release the hub from the light arm.

3. Attach the new hub to the light arm by following steps 1 & 2 in reverse. Use a small quantity of thread releaseable locktite on the two socket head screws.

4. Lubricate the hub with the lubraplate provided. Mount the light to the post using the nylon washer.
